COMMUNITY ACTION PLAN *for*
CLEAN AIR

A five-year strategy

PREPARED FOR

Communities located within the Bulkley Valley-Lakes District airshed

IN CONSULTATION WITH

Ministry of Environment
Skeena Region Environmental Quality Section
Smithers, B.C.

REVISED JUNE 2006

ACKNOWLEDGEMENTS

The June 2006 version of the Clean Air Plan reflects consultations with air quality meteorologists, residents, foresters, emission experts, local government, industry, and healthcare professionals over the last two years.

The original Plan (June 2004) was a group effort of 20 writers, prepared under a Ministry of Environment initiative beginning in November 2002. That writing team was composed of technical, medical and operational experts as well as community level representatives.

Most of the writers are local residents, and include members of the Regional Working Group and Subcommittees, Community Working Groups, the Ministry of Environment, the Facilitation team, and outside experts as required. Thank you to the many volunteers and representatives who sat on or participated in those working groups and emission-source specific forums, as well as their sponsoring employers. The Plan would not have been written without their expertise, enthusiasm and commitment to clean air.

Many thanks are also due to the individuals who take the time to offer their concerns and solutions regarding air quality in our airshed. Whether this is a five minute conversation on the street, a phone call, an e-mail, or part of a public forum, your comments and suggestions provide a direct link to the greater community in the BVL D.

As our tagline says, the Airshed Management Society is committed to offering *clean air solutions we can all live with*...your input will ensure we stay true to this mandate.

Laurie Gallant

Facilitator for the BVL D Airshed Management Society

EXECUTIVE SUMMARY	vii
CHAPTER 1	
INTRODUCTION	1-1
CHAPTER 2	
FINE PARTICULATE POLLUTION	
2.1 Fine Particulates and Human Health	2-1
2.2 Economic Opportunities	2-2
CHAPTER 3	
SUPPORTING SCIENCE AND TECHNICAL INFORMATION	
3.1 Air Quality Science	3-1
3.2 How Emissions Were Selected	3-4
3.3 Other Contributing Emissions Sources	3-5
3.4 General Goals, Indicators and Strategies	3-7
CHAPTER 4	
BEEHIVE BURNERS	
4.1 Background	4-1
4.2 Significance of Source to Ambient Air Quality	4-2
4.3 Emission Reduction Efforts to Date	4-3
4.4 Relevant Regulation and Community Plans	4-4
4.5 Community Consultation	4-4
4.6 Goals, Indicators and Strategies	4-4
4.7 Tools and Resources	4-6
CHAPTER 5	
OTHER REGULATED INDUSTRIAL SOURCES	
5.1 Background	5-1
5.2 Significance of Source to Ambient Air Quality	5-2
5.3 Relevant Regulation and Community Plans	5-2
5.4 Emission Reduction Efforts to Date	5-3
5.5 Goals, Indicators and Strategies	5-3
5.6 Tools and Resources	5-5
CHAPTER 6	
FOREST HARVEST DEBRIS BURNING	
6.1 Background	6-1
6.2 Significance of Source to Ambient Air Quality	6-1
6.3 Emission Reduction Efforts to Date	6-2
6.4 Relevant Regulations and Community Plans	6-3
6.5 Community Consultation and Key Players	6-3
6.6 Goals, Indicators and Strategies	6-3
6.7 Additional Working Group Recommendations	6-6
6.8 Tools and Resources	6-6

CHAPTER 7

AGRICULTURE, LAND DEVELOPMENT & SMALL SAWMILL DEBRIS BURNING

7.1 Background	7-1
7.2 Significance of Source to Ambient Air Quality	7-1
7.3 Emission Reduction Efforts to Date	7-1
7.4 Relevant Regulations and Community Plans	7-2
7.5 Community Consultation and Key Players	7-2
7.6 Goals, Indicators and Strategies	7-2
7.7 Additional Working Group Recommendations	7-3
7.8 Tools and Resources	7-4

CHAPTER 8

RESIDENTIAL & COMERCIAL SPACE HEATING

8.1 Background	8-1
8.2 Significance of Source to Ambient Air Quality	8-1
8.3 Emission Reduction Efforts to Date	8-2
8.4 Relevant Regulations and Community Plans	8-2
8.5 Goals, Indicators and Strategies	8-2
8.6 Tools and Resources	8-3

CHAPTER 9

BACKYARD BURNING

9.1 Background	9-1
9.2 Significance of Source to Ambient Air Quality	9-1
9.3 Emission Reduction Efforts to Date	9-1
9.4 Relevant Regulations and Community Plans	9-2
9.5 Community Consultation and Key Players	9-2
9.6 Goals, Indicators and Strategies	9-2
9.7 Additional Working Group Recommendations	9-3
9.8 Tools and Resources	9-3

CHAPTER 10

ROAD DUST

10.1 Background	10-1
10.2 Significance of Source to Ambient Air Quality	10-1
10.3 Emission Reduction Efforts to Date	10-1
10.4 Relevant Regulations and Community Plans	10-2
10.5 Community Consultation and Key Players	10-2
10.6 Goals, Indicators and Strategies	10-2
10.7 Tools and Resources	10-3

CHAPTER 11	
WORKING THE PLAN	
11.1 Background	11-1
11.2 Structure	11-1
11.1 MOE Role	11-2

How to Contact Us

This Plan is reviewed annually to measure progress towards goals and the effectiveness of the indicators and strategies for reaching those goals. The Plan contents may be revised through a consensus-based process at the Annual Plan Review meeting and through the Board of Directors. Submissions will be available for review at any time, and will be circulated in advance and added to the agenda of each yearly plan review meeting.

Individuals or organization wishing to join BVL DAMS, assist in implementation of specific initiatives listed in the Plan, or submit amendments, should also direct their inquiries to the process facilitators at:
