# COMMUNITY ACTION PLAN *for* CLEAN AIR

---

## *A five-year strategy*

PREPARED BY

Laurie Gallant BES  
Facilitator for the BVLDAirshed Management Society  
c/o Footprint Environmental Strategies  
Smithers, B.C.

IN CONSULTATION WITH

Ministry of Environment  
Skeena Region Environmental Quality Section  
Smithers, B.C.

LAST UPDATE: JUNE 1, 2006

## ACKNOWLEDGEMENTS

---

The writing of the original Plan (June 2004) was a group effort, over a period of almost two years. All told, there were about 20 writers composed of technical, medical and operational experts as well as community level representatives. Most of the writers are local residents, and include members of the Regional Working Group and Subcommittees, Community Working Groups, the Ministry of Environment, the Facilitation team, and outside experts as required.

Thank you to the many volunteers and representatives who sit on or participated in the following working groups and emission-source specific forums:

Bulkley Community Working Group, with representatives from the Hazeltons and Kitwanga

Lakes Community Working Group

Morice Community Working Group

Regional Working Group (RWG)

Road Dust Forum Participants

Resource Management Burning Subcommittee of the RWG

Advisory Committee to the RWG

Science Team from MOE - Skeena Region

Facilitators (Footprint Environmental Strategies)

The individuals on these working groups and committees represent concerned citizens, parents, health professionals, industry, local government, business, farmers and ranchers, and the provincial government. The Plan would not have been written without their expertise, enthusiasm and commitment to clean air.

Also, many thanks to the individuals who read the regular BVLDDAMP Updates, visited the website, and took the time to discuss issues and solutions with the core group. Your comments and suggestions provided a direct link to the greater community in the BVLDD, making it easier for the writers to make recommendations that truly reflect common regional goals and strategies.

### *Financial Sponsors*

The process for developing the Clean Air Plan and implementation of core programs related to airshed management such as Custom Venting Index Forecasting and the Skeena-BVLDD Woodstove Exchange Program was made possible by the financial contributions of a broad range of partners. The Ministry of Environment contributed \$180,000 and the North American Fund for Environmental Cooperation contributed \$40,000. Together, Pacific Inland Resources, Canfor, Houston Forest Products, Decker Lake Forest Products, Babine Forest Products, Newpro and Cheslatta Forest Products contributed \$25,000. The BC Lung Association contributed \$3,000 to the budget as well. All together, the total budget for the planning process was \$248,000 for 2003-2004.
